RE: Internet Policy

Dear Parent/Guardian

St. Francis Xavier School provides access to the internet for all students. We believe the internet offers valuable resources to both students and teachers. Our goal in providing this service is to provide opportunities for research, creativity, and communication. With access to information from all over the world also comes the availability of material that may not be appropriate for use in the school environment.

St. Francis Xavier School has instituted certain precautions through supervised access and in compliance with the Children’s Internet Protection Act (CHIP). However, on a global network, it is impossible to control all materials, and a persistent student may discover controversial information. The school firmly believes that the valuable information and interaction available on the global network far outweighs the possibility that users may procure material that is not consistent with the educational goals of the school.

So that a student may be granted access to utilize the internet, they must read and sign the acceptable user guidelines. Only students with the agreement on file will be allowed to use school-provided electronics. This document is due back at school on or before August 14<sup>th</sup>.
